

# Fighting for Clean Air!

The Clean Air Act protects public health by reducing harmful pollution, soot, and air toxins, and gives the Environmental Protection Agency the ability to clean up the air. Yet, the Clean Air Act faces stiff opposition from some in Congress, threatening the progress the U.S. has made in making our air safe to breathe.

## HELP US PROTECT THE CLEAN AIR ACT

Assistant Vice President of the American Lung Association Peter Iwanowicz will speak on the current state of the Clean Air Act and our efforts with the Healthy Air Campaign. Join the American Lung Association for lunch to learn what the Clean Air Act means for Chicagoland and Illinois as a whole and how we can work together to make sure we have healthy, safe air to breathe.

WEDNESDAY, FEBRUARY 1, 2012

Noon—1:30 p.m. | Lunch will be provided

American Lung Association in Greater Chicago

55 W. Wacker Dr. Suite 800 Chicago, IL 60601
